EXPERIENCE

JavaScript Developer

📍 Gain Solutions 📅 March, 2023 – Present

☐ Proficient in ReactJS, Next.js

Built dynamic and responsive web applications using ReactJS, Next.js, and VanillaJs, ensuring seamless user experiences and efficient data handling. Additionally, integrated third-party libraries to extend functionality and improve development efficiency.

☐ Extensive Use of Redux for State Management:

Managed and maintained a consistent application state by utilizing Redux, optimizing the performance and reliability of complex web applications.

☐ Experience with CSS, Tailwind CSS, and Bootstrap:

Developed mobile-responsive interfaces for live websites using CSS, Tailwind CSS, and Bootstrap, ensuring accessibility and aesthetic consistency across devices.

☐ Effective Git Version Control in Collaborative Environments:

Collaborated with a cross-functional team using Git for version control, efficiently managing codebase changes and resolving merge conflicts to maintain project integrity.

TECH STACK

- Programming Languages: JavaScript, C++
- Frameworks: React, NextJs, Redux, Bootstrap, Tailwind CSS
- UI library: MaterialUI., Ant design, Prime React, FLOWbite, ShadCN
- Database: MongoDB
- Version Control: GIT/GitHub
- Project Management Tools – Trello, Jira, Slack, Notion, Teams
- SEO – Basic understanding of SEO
- Others: Mongoose, Express, NodeJS, REST-API, Firebase, Json, HTML, CSS
- Packages: ApexChart, ReChart, ChartJs, i18next, react-big-calendar, Slick, Swiper

FEATURED OFFICIAL PROJECTS

✓ Unite Living (<https://uniteliving.com>)

Unite Living - Norway's Premier Home-Searching Platform:

An online platform that simplifies finding rental properties in Norway, allowing users to easily browse, compare, and select homes.

Tech Stack: ReactJS, Redux, Bootstrap, SCSS, GraphQL

- ✓ Payrun (<https://payrun.app>)

An HRM SaaS Solution

A comprehensive HRM platform used to manage employee salary, leave, shifts, departments, projects, tasks, and punch in/out records, simplifying HR operations for businesses.

Tech Stack: NextJS, Redux, TailwindCSS, Ant design, GraphQL, CSS

- ✓ Esydesk (<https://dev.esydesk.app>)

A ticketing system

A tool to manage customer support by organizing messages, providing assistance, and facilitating communication with customers through a single point of contact (SPC) using a ticketing system.

Tech Stack: NextJS, Redux, TailwindCSS, Flowbite, GraphQL, CSS

PERSONAL PROJECTS

- ✓ Advanced Color Picker Website:

🔗 https://ribpy.github.io/colorPicker_vanillaJs/

A web-based color picker tool built with Vanilla JS, offering features like testing color choices against background images for enhanced design flexibility.

- ✓ Simple e-commerce app

🔗 <https://doozie.netlify.app/>

This is a simple e-commerce application featuring product sorting, filtering, and search functionalities. Users can add products to the cart directly from the search results or the product details page.

Technologies used: React.js, Redux Toolkit, Swiper, Lodash, Tailwind CSS.

- ✓ Portfolio app

🔗 <https://ribpy.github.io/portfolio/>

- My portfolio website containing my other projects on the work section.
- Developed this site just using vanilla JS and raw CSS.
- There are four main sections in this site. This site just has front end, so backend is connected to this site.

EDUCATION

B.Sc. Engineering in Information and Communication Engineering

Noakhali Science & Technology University

📅 2017-2022 (Result Published- April '22)

Higher Secondary Certificate

Govt. Science College, Tejgaon, Dhaka

📅 2013-2015

PROBLEM SOLVING

- Solved total 140+ problems on Online Judges

Online Judges:

Codewars(85+)

LeetCode(25+)

Excercism(20+)

CO-CURRICULAR ACTIVITIES

- President of Hatiya Student Forum NSTU (2020-2023)
- Campus ambassador of BongoDev

PERSONAL SKILLS

- Public Speaking
- Leadership
- Debating
- Problem Solving
- Organizing and Management
